An Introduction: Stone County 2004 Adult Health Survey

What Is Hometown Health Improvement?

Hometown Health Improvement is a grassroots initiative that stresses cooperation, coalition building, community health assessment, prioritization of health issues, and the development and implementation of strategies designed and sustained locally. As part of this initiative, Stone County conducted the Adult Health Survey using questions from the Behavioral Risk Factor Surveillance System (BRFSS).

What Is the BRFSS?¹

In the early 1980s, the Centers for Disease Control and Prevention worked with the states to develop the Behavioral Risk Factor Surveillance System. This state-based survey, the first of its kind, collected, analyzed and published information on the prevalence of risk behaviors among Americans and their perceptions of a variety of health issues.

Now conducted in all 50 states, the BRFSS continues to be the primary source of information on major health risk behaviors among Americans. State and local health departments rely heavily on BRFSS data to:

- Determine priority health issues and identify populations at highest risk.
- Develop strategic plans and target prevention programs.
- Monitor the effectiveness of intervention strategies and progress toward prevention goals.
- Educate the public, the health community, and policymakers about disease prevention.
- Support community policies that promote health and prevent disease.

BRFSS information is also used by researchers, voluntary and professional organizations, and managed care organizations to target prevention efforts. Recognizing the value of such a system in addressing priority health issues in the coming century, China, Canada, and other countries have looked to CDC for assistance in establishing BRFSS-like systems for their own populations.

BRFSS data can be analyzed by a variety of demographic variables, including age, education, income, and racial and ethnic background. The ability to determine populations at highest risk is essential in effectively targeting scarce prevention resources.

Atlanta, Georgia.

Why Did Stone County Conduct the Adult Health Survey?

As the demand for data at a local level has increased, state, county, and local health agencies have begun using the BRFSS to develop county and local information about health risk behaviors. The Stone County Adult Health Survey was conducted to gather health information on a variety of behaviors that can impact health in both good and bad ways, including smoking, exercise, access to medical care, women's health, quality of life, chronic diseases, cancer screening, and other health related issues.

How Did Stone County Conduct the Adult Health Survey?

During January 2004, 826 randomly selected adults answered the Stone County Adult Health Survey telephone survey. Interviews were conducted and supervised by trained telephone research interviewers at the University of Arkansas at Little Rock's Institute of Government. The data were then weighted to be representative of the sex and age distribution of Stone County. All percentages presented in this report are rounded to the nearest whole percent.

Who Participated in the Stone County Adult Health Survey?

Of the 826 people who were interviewed, 350 were men and 476 were women, and 808 were White and none were identified as Black or Hispanic. The following chart summarizes the demographics of the survey participants as both raw numbers and as weighted data. All other data presented in the report is based on the weighted data.

Risk Factors

Health Status

The survey asked respondents to rate their general, physical, and mental health status.

Risk Factor Definition: General Health

Question: Would you say that your general health is “excellent,” “very good,” “good,” “fair,” or “poor?”

At Risk: Those who answered “fair” or “poor” are considered at risk.

Who's At Risk in Stone County?

Twenty-nine percent characterized their general health as fair or poor. Younger people and people with more income or education tended to report better general health.

Physical Health

Risk Factor Definition: Physical Health

Question: Now thinking about your physical health, which includes physical illness and injury, for how many days during the past 30 days was your physical health not good?

At Risk: Having one or more self-reported days of “not good” physical health.

Who's At Risk in Stone County?

Forty-eight percent of Stone County adults had at least one day a month of poor physical health. According to the survey, the average Stone County adult had six days of bad health and six days each month when health problems interfered with usual activities. People with less income or education were more likely to be affected by poor health.

Mental Health

Risk Factor Definition: Mental Health

Question: Now thinking about your mental health, which includes stress, depression, and problems with emotions, for how many days during the past 30 days was your mental health not good?

At Risk: Having one or more self-reported days of “not good” mental health.

Who's At Risk in Stone County?

Thirty-five percent had at least one day of poor mental health in the past month. The average Stone County adult had five days each month of poor mental health. People with less annual household income were more likely to report at least one day of poor mental health in the past month.

Health Care Access

The survey asked if respondents had health insurance and about barriers to getting insurance.

Health Insurance

Risk Factor Definition: Health Insurance

Question: Do you have any kind of health care coverage, including health insurance, prepaid plans such as HMOs, or government plans such as Medicare?

At Risk: Those who answered “no” are considered at risk.

Who's At Risk in Stone County?

Thirty percent said they didn't have health insurance, with younger respondents and those with less education less likely to be insured.

Chronic Conditions Hypertension

Questions regarding specific chronic medical conditions were included in the Stone County Adult Health Survey.

Risk Factor Definition: Have High Blood Pressure

Questions: Have you ever been told by a doctor, nurse, or other health professional that you have high blood pressure? -and – Are you currently taking medicine for your high blood pressure?

At Risk: Those who answered “yes” are considered at risk.

Who's At Risk in Stone County?

Thirty-three percent of Stone County adults have been given a hypertension diagnosis by a doctor. Older respondents were more likely to report having high blood pressure.

Cholesterol

Risk Factor Definition: Have Not Had Blood Cholesterol Checked in Past 2 Years

Question s: 1. Blood cholesterol is a fatty substance found in the blood. Have you ever had your blood cholesterol checked?
2. About How long has it been since you had your blood cholesterol checked?

At Risk: Those who have not had their blood cholesterol checked within the past 2 years are considered at risk.

Who's At Risk in Stone County?

Forty-two percent of Stone County adults have not had their blood cholesterol tested within the past two years. Younger respondents were far less likely to have had their blood cholesterol tested within the past two years.

Cholesterol

Risk Factor Definition: Have High Blood Cholesterol

Question: Have you ever been told by a doctor, nurse, or other health professional that your blood cholesterol is high?

At Risk: Those who answered "yes" are considered at risk.

Who's At Risk in Stone County?

Thirty-seven percent of Stone County adults have been given a high blood cholesterol diagnosis by a doctor. Older people and those with less education were more likely to report a high blood cholesterol diagnosis than others.

Asthma

Risk Factor Definition: Have Asthma

Question: Have you ever been told by a doctor, nurse, or other health professional that you had asthma?

At Risk: Those who said "yes" are considered at risk.

Who's At Risk in Stone County?

Eleven percent said they had been told by a doctor that they have asthma. People with less education were more like to report that they had asthma.

Diabetes

Questions regarding specific chronic medical conditions were included in the Stone County Adult Health Survey.

Risk Factor Definition: Have Diabetes

Question: Have you ever been told by a doctor that you have diabetes?

At Risk: Those who answered “yes” are considered at risk.

Who's At Risk in Stone County?

Eight percent of Stone County adults have been given a diabetes diagnosis by a doctor. Older people were more likely to report a diabetes diagnosis than others.

Arthritis

Questions regarding specific chronic medical conditions were included in the Stone County Adult Health Survey.

Risk Factor Definition: Have Arthritis

Question: Have you ever been told by a doctor that you have arthritis?

At Risk: Those who answered “yes” are considered at risk.

Who's At Risk in Stone County?

Thirty-three percent of Stone County adults have been given an arthritis diagnosis by a doctor. Older people and those with less annual household income were more likely to report arthritis than others.

Arthritis

Risk Factor Definition: Have Activity Limitation Due to Joint Symptoms

Question: Are you now limited in any way in any activities because of joint symptoms?

At Risk: Those who answered "yes" are considered at risk.

Who's At Risk in Stone County?

Thirty-eight percent of Stone County adults indicated a limitation in activities because of joint symptoms. Older people, people with lower incomes, and those with less education were more likely to report an activity limitation due to joint symptoms than others.

Colorectal Cancer Screening

Questions regarding colorectal cancer screening were included in the Stone County Adult Health Survey.

Risk Factor Definition: Over Age 50 and Never Been Screened

Question: Sigmoidoscopy and colonoscopy are exams in which a tube is inserted into the rectum to view the bowel for signs of cancer or other health problems. Have you ever had these exams?

At Risk: Those aged 50 and older who answered “no” are considered at risk.

Who's At Risk in Stone County?

Fifty-seven percent of Stone County adults over the age of 50 have never been screened for colorectal cancer.

Prostate Cancer Screening

Questions regarding prostate cancer screening were included in the Stone County Adult Health Survey.

Risk Factor Definition: Male, Over Age 50, and Not Screened Within the Past Year

Question: A Prostate-Specific Antigen test, also called a PSA test, is a blood test used to check men for prostate cancer. A digital rectal exam is an exam in which a doctor, nurse, or other health professional places a gloved finger into the rectum to feel the size, shape, and hardness of the prostate gland. Have you ever had these exams?

At Risk: Those aged 50 and older who answered “no” are considered at risk.

Who's At Risk in Stone County?

Sixty-three percent of Stone County males over age 50 indicated they had not been screened for prostate cancer within the past year.

Immunization

Risk Factor Definition: No Flu Shot

Question: During the past 12 months, have you had a flu shot?

At Risk: Those who answered "No" are considered at risk.

Who's At Risk in Stone County?

Fifty-nine percent of Stone County adults have not had a flu shot during the past 12 months. Younger people were far less likely to have had a flu shot during the past 12 months.

Physical Activity

Questions about physical activity and exercise were asked to the Stone County Adult Health Survey participants.

Risk Factor Definition: Do Not Participate in Regular Physical Activity

Questions: 1. During the past 30 days, other than your regular job, did you participate in any physical activities or exercises such as running, calisthenics, golf, gardening, or walking for exercise?

At Risk: Those who do not participate in physical activity on a regular basis are at risk.

Who's At Risk in Stone County?

Forty-one percent of Stone County's adult residents did not participate in regular physical activity during the past month. Younger respondents and those with more education or income were more likely to get regular exercise.

Overweight

Risk Factor Definition: Overweight as Measured by Body Mass Index

Questions: 1. How much do you weigh without shoes?
2. How tall are you without shoes?

At Risk: Those with a Body Mass Index (BMI) of greater than 25.0 are overweight.
BMI is a ratio of weight to height.

Who's At Risk in Stone County?

Sixty-three percent of Stone County's adults are overweight. Those with higher annual household income and those with less education were more likely to be overweight.

Disability

Survey respondents were asked about health problems or impairments they had.

General Activity Limitations

Risk Factor Definition: Activity Limitations

Questions: Are you limited in any way in any activities because of physical, mental, or emotional problems?

At Risk: Those who answered “yes” are considered at risk.

Who's At Risk in Stone County?

Twenty-nine percent of the adults in Stone County reported that they had some activity limitations caused by a health condition. Respondents with less income or education were more likely to report activity limitations.

Alcohol Consumption

Questions about alcoholic beverage consumption were asked to Stone County Adult Health Survey respondents.

Risk Factor Definition: Binge Drinking

Question: Considering all types of alcoholic beverages, how many times during the past month did you have five or more drinks on an occasion?

At Risk: Those who had five or more drinks in a row on one or more occasions during the past month are considered at risk.

Who's At Risk in Stone County?

Of those who reported drinking at least once in the past thirty days, twenty-eight percent said they had consumed five or more drinks on at least one occasion in the past month. Younger people were more likely to report binge drinking.

Tobacco Use

Questions regarding cigarette smoking, attempts to quit smoking, smoking in the household, and other tobacco use were asked as part of the Stone County Adult Health Survey.

Cigarette Smoking

Risk Factor Definition: Currently Smoke Cigarettes

Question: Do you smoke cigarettes every day, some days, or not at all?

At Risk: Those who answered “every day” or “some days” are considered at risk.

Who's At Risk in Stone County?

Twenty-five percent of the adults in Stone County smoked cigarettes in the past month. Younger people and people with less education or income were more likely to smoke cigarettes.

Cigarette Smoking Cessation

Risk Factor Definition: Smoking Cessation

Question: During the past 12 months, have you quit smoking for one day or longer?

At Risk: **Of those who smoked in the past month**, people who answered “no” are considered at risk for continued cigarette smoking.

Who's At Risk in Stone County?

Of the current adult smokers in Stone County, forty-one percent had quit for at least one day in the past year. Younger smokers and smokers with higher annual household income were less likely to have had a smokeless day in the past year.

Smoking in Home

Risk Factor Definition: Smoking is allowed in the home

Question: Which statement best describes the rules of smoking inside your home?

At Risk: Those who did not indicate that smoking is not allowed anywhere inside the home are considered at risk.

Who's At Risk in Stone County?

Thirty-seven percent of the adults in Stone County indicated that smoking is allowed inside their home. Younger respondents and those with less education or income were more likely to live in homes where smoking is allowed.

Tobacco Use Summary

Questions regarding cigarette smoking, attempts to quit smoking, smoking in the household, and other tobacco use were asked as part of the Stone County Adult Health Survey.

**Of those who have ever tried smoking tobacco in a pipe, even one or two puffs*

***Of those who have ever tried smoking a cigar, even one or two puffs*

Women's Health & Risk Factor

Women's Health and the Stone County Adult Health Survey

Stone County Adult Health Survey Women's Demographics

Total Number of People Surveyed		
Male	Female	Total Surveyed
350	476	826

Women & Behavioral Risk Factors

In addition to the standard BRFSS questions, the Stone County survey included special questions about women's health issues. Women's health concerns more than just breast care and reproductive health. Disparities between women's and men's health exist among various risk factors. Specific health issues that were investigated in conjunction with women's health concerns in Stone County include self-reported perceptions of health, utilization of preventative health care and health screenings, and personal risk behaviors.

Risk Factors--Perceptions of Health

Women were far more likely to report that their mental health had been "not good" on one or more days during the past month.

Risk Factors--Health Care

Stone County women were equally as likely as men to not have health insurance.

Risk Factors--Health Habits

Stone County women were less likely than Stone County men to be smokers and to be overweight, but women were less likely to get regular exercise.

Breast Cancer Screening

Women were asked when they had their last mammogram.

Mammography-Women 40 and Older

Risk Factor Definition: Mammograms

Question: A mammogram is an x-ray of each breast to look for breast cancer. Have you ever had a mammogram?
How long has it been since your last mammogram?

At Risk: Women 40 and older who haven't had a mammogram in the past two years are considered at risk.

Who's At Risk in Stone County?

Thirty-four percent of women 40 and older had not had a mammogram within the past year. Lower income women were more likely to report not receiving the screening within the past two years.

Cervical Cancer Screening

Pap Smear

Risk Factor Definition: Pap Smear

Question: A Pap smear is a test for cancer of the cervix. Have you ever had a Pap smear?
How long has it been since your last Pap smear?

At Risk: Women 18 or older with an intact uterus who have not had a Pap smear within the past three years are considered at risk.

Who's At Risk in Stone County?

Thirty-three percent of Stone County adult women had not had a Pap smear within the past three years. Women with lower incomes, older women, and women with less education were less likely to have had this screening test.

Stone County, Arkansas, and United States BRFSS Data Compared

How Does Stone County Compare?

In order to determine Stone County's adult health strengths and weaknesses, its Adult Health Survey data was compared to state and nationwide data from the 2001 and 2002 BRFSS.

Health Status

Stone County adults reported their general health to be fair or poor more often than the rest of the nation. Furthermore, more of them reported their physical health was not good on one or more days during the past month compared to the state and the nation as a whole.

Health Habits

Current Smokers

Overweight

No Leisure Time Physical Activity

Stone County respondents were more likely to report no leisure time physical activity compared to the state and nation as a whole.

Health Care Access and Routine Health Screenings

Stone County has a high percentage of uninsured adults. Furthermore, a high percentage of Saline County women do not receive routine mammogram and Pap smear cancer screening tests compared to state and national figures.

Appendix

Stone County Adult Health Survey Questions

The following questions were administered as part of the Hometown Health County Adult Health Survey. The interviews were conducted by telephone, so a telephone interview script was used by the telephone interviews complete with notes and instructions regarding skipping certain questions, etc. Interested parties can obtain a complete copy of the script used to conduct the interview from their local Hometown Health leaders.

Section 1: Health Status

- 1.1. Would you say that in general your health is excellent, very good, good, fair or poor?
- 1.2. Now thinking about your physical health, which includes physical illness and injury, for how many days during the past 30 days was your physical health not good?
- 1.3. Now thinking about your mental health, which includes stress, depression, and problems with emotions, for how many days during the past 30 days was your mental health not good?
- 1.4. During the past 30 days, for about how many days did poor physical or mental health keep you from doing your usual activities, such as self-care, work, or recreation?

Section 2: Health Care Access

- 2.1. Do you have any kind of health care coverage, including health insurance, prepaid plans such as HMOs, or government plans such as Medicare?
- 2.2. What type of health care coverage do you use to pay for most of your medical care?
- 2.3. There are some types of coverage you may not have considered. Please tell me if you have any of the following (list of insurance plans).

Section 3: Exercise

- 3.1. During the past 30 days, other than your regular job, did you participate in any physical activities or exercise such as running, calisthenics, golf, gardening, or walking for exercise?

Section 4: Hypertension Awareness

- 4.1. Have you ever been told by a doctor, nurse, or other health professional that you have high blood pressure.
- 4.2. Are you currently taking medicine for your high blood pressure?

Section 5: Cholesterol Awareness

- 5.1 Have you ever had your blood cholesterol checked?
- 5.2 About How long has it been since you had your blood cholesterol checked?
- 5.3 Have you ever been told by a doctor, nurse, or other health professional; that your blood cholesterol is high?

Section 6: Asthma

- 6.1 Did a doctor ever tell you that you had asthma?
- 6.2 Do you still have asthma?

Section 7: Diabetes

- 7.1. Have you ever been told by a doctor that you have diabetes?

Section 8: Arthritis

- 8.1. During the past 12 months, have you had pain, aching, stiffness or swelling in or around a joint
- 8.2. Were these symptoms present on most days for at least one month?
- 8.3. Are you now limited in any way in any activities because of joint symptoms?
- 8.4. Have you ever seen a doctor, nurse, or other health professional for these joint symptoms?
- 8.5. Have you ever been told by a doctor that you have arthritis?
- 8.6. Are you currently being treated by a doctor for arthritis?

Section 9: Immunization

- 9.1. During the past 12 months, have you had a flu shot?
- 9.2. Have you ever had a pneumonia shot?

Section 10: Tobacco Use

- 10.1. Have you smoked at least 100 cigarettes in your entire life?
- 10.2. Do you now smoke cigarettes everyday, some days, or not at all?
- 10.3. On the average, about how many cigarettes a day do you now smoke?

Section 11: Alcohol Consumption

- 11.1 A drink is 1 can or bottle of beer, 1 glass of wine, 1 can or bottle of wine cooler, 1 cocktail, or shot of liquor. During the past 30 days, how often have you had at least one drink of any alcoholic beverage?
- 11.2 On the days when you drank, about how many drinks did you drink on the Average?
- 11.3 Considering all types of alcoholic beverages, how many times during the past 30 days did you have 5 or more drinks on a occasion?

Section 12: Firearms

- 12.1. Are any firearms now kept in or around your home? Include those kept in a garage, outdoor storage area, car, truck, or other motor vehicle.

Section 13: Demographics

- 13.1. What is your age?
- 13.2. Are you Hispanic or Latino?
- 13.3. Which one or more of the following would you say is your race?
- 13.4. Which one of these groups best represent your race?
- 13.5. Are you married, divorced, widowed, separated, never been married, or a member of an unmarried couple?
- 13.6. How many children less than 18 years of age live in your household ?
- 13.7. What is the highest grade or year of school you completed?
- 13.8. What is your current employment status?

- 13.9. What is your annual household income from all sources?
- 13.10. About how much do you weigh without shoes?
- 13.11. About how tall are you without shoes?
- 13.12. What is your ZIP Code?
- 13.13. Do you have more than one telephone number in your household?
- 13.14. How many residential telephone numbers do you have?
- 13.15a. Has your regular home telephone service been disconnected in the last 12 months?
- 13.15b. In the past 12 months, about how many months in total were you without a working home telephone? (Do not count cell phones)
- 13.16. Indicate sex of respondent. (Ask Only if Necessary)

Section 14: Disability

- 14.1. Are you limited in any way in any activities because of physical, mental, or emotional problems?
- 14.2. Do you now have any health problem that requires you to use special equipment, such as a cane, a wheelchair, a special bed, or a special telephone?

Section 15: Physical Activity

- 15.1. When you are at work, which of the following best describes what you do?
- 15.2. Now thinking about the moderate physical activities you do (when you are not working) if "employed" or "self-employed" in a usual week, do you do moderate activities for at least 10 minutes at a time, such as brisk walking, bicycling, vacuuming, gardening, or anything else that causes small increases in breathing or heart rate?
- 15.3. How many days per week do you do these moderate activities for at least 10 minutes at a time?
- 15.4. On days when you do moderate activities for at least 10 minutes at a time, how much total time per day do you spend doing these activities?
- 15.5. Now thinking about the vigorous physical activities you do (when you are not working) if "employed" or "self-employed" in a usual week, do you do vigorous activities for at least 10 minutes at a time, such as running, aerobics, heavy yard work, or anything else that causes large increases in breathing or heart rate?
- 15.6. How many days per week do you do these vigorous activities for at least 10 minutes at a time?

- 15.7. On days when you do vigorous activities for at least 10 minutes at a time, how much total time per day do you spend doing these activities?

Section 16: Prostate Cancer Screening

- 16.1. A Prostate Specific Antigen test, also called a PSA test, is a blood test used to check men for prostate cancer. Have you ever had a PSA test?
- 16.2. How long has it been since you had your last PSA test?
- 16.3. A digital rectal exam in which a doctor, nurse, or other health professional places a gloved finger into the rectum to feel the size, shape, and hardness of the prostate gland. Have you ever had a digital rectal exam?
- 16.4. How long has it been since you had your last digital rectal exam?
- 16.5. Have you ever been told by a doctor, nurse, or other health professional that you had prostate cancer?
- 16.6. Has your father, brother, son, or grandfather ever been told by a doctor, nurse, or health professional that he had prostate cancer?

Section 17: Colorectal Cancer Screening

- 17.1. A blood stool test is a test that may use a special kit at home to determine whether stool contains blood. Have you ever had this test using a home kit?
- 17.2. How long has it been since you had your last blood stool test using a home kit?
- 17.3. Sigmoidoscopy and colonoscopy are exams in which a tube is inserted in the rectum to view the bowel for signs of cancer or other problems. Have you ever had these exams?
- 17.4. How long has it been since you had your last Sigmoidoscopy or colonoscopy?

Section 18: HIV/AIDS

- 18.1 A pregnant woman with HIV can get treatment to help reduce the chances that she will pass the virus on to her baby. (True/False)?
- 18.2 There are medical treatments available that are intended to help a person who is infected with HIV to live longer. (True/False)?
- 18.3 How effective do you think these treatments are helping persons with HIV to live longer?
- 18.4 How important do you think it is for people to know their HIV status by getting tested?
- 18.5 As far as you know, have you ever been tested for HIV? Do not count tests you may have had as part of a blood donation.
- 18.6 Not including blood donations, in what month and year was your last HIV test?
- 18.7 What was the main reason you had your last test for HIV?
- 18.8 Where did you have the HIV test in... ?
- 18.9 In the past 12 months has a doctor, nurse, or other health professional talked to you about preventing sexually transmitted diseases through condom use?

County Selected Modules

Module 5: Women's Health

- 1. What types of things can women do to help in the early detection of breast cancer?
- 2. Is there anything else women can do to help in the early detection of breast cancer?
- 3. A mammogram is an x-ray of each breast to look for breast cancer. Have you ever had a mammogram?
- 4. What is the most important reason why you haven't had a mammogram?
- 5. Are there any other reasons why you haven't had a mammogram?
- 6. How long has it been since you had your last mammogram?
- 7. What is the most important reason why you haven't had a mammogram in the past two years?
- 8. Are there any other reasons why you haven't had a mammogram in the past two years?

9. Was your last mammogram done as part of a routine checkup, because of a breast problem, or because you've already had breast cancer?
10. In the past month, have you noticed any posters, billboards, commercials or advertisements with a message about having a mammogram test?
11. Are you aware that the health department offers free to low cost breast exams and mammograms?
12. How often do you believe women your age should get a mammogram?
13. Did a doctor suggest that you have your most recent mammogram?
14. Have you ever had breast cancer?
15. Do you think your risk of getting breast cancer is high, medium, low, or none?
16. If you wanted to have a mammogram, would you have to pay for all, part or none of the cost?
17. How difficult would it be for you to pay for the cost of the mammogram test? Would you say very difficult, somewhat difficult, a little difficult or not at all difficult?
18. Have you ever had a clinical breast exam?
19. How long has it been since your last breast exam?
20. Was your last breast exam done as part of a routine checkup, because of a breast problem other than cancer, or because you've already had breast cancer?
21. A Pap smear is a test for cancer of the cervix. Have you ever had a Pap smear?
22. How long has it been since you had your last Pap smear?
23. Was your last Pap smear done as part of a routine exam, or to check a current or previous problem?
24. Have you had a hysterectomy?

Module 13: Tobacco Indicators

1. How old were you the first time you smoked a cigarette, even one or two puffs?
2. How old were you when you first started smoking cigarettes regularly?
3. About how long has it been since you last smoked cigarettes regularly?
4. In the past 12 months, have you seen a doctor, nurse, or other health professional to get any kind of care for yourself?
5. In the past 12 months, has a doctor, nurse, or other health professional advised you to quit smoking?
6. Which statement best describes the rules about smoking inside your home?
7. While working at your job, are you indoors most of the time?
8. Which of the following best describes your place of work's official smoking policy for indoor public or common areas, such as lobbies, rest rooms, and lunchrooms?
9. Which of the following best describes your place of work's official smoking policy for work areas?

Module 14: Other Tobacco Products

1. Have you ever used or tried any smokeless tobacco products such as chewing tobacco or snuff?
2. Do you currently use chewing tobacco or snuff everyday, some days, or not at all?
3. Have you ever smoked a cigar, even one or two puffs?
4. Do you now smoke cigars everyday, some days, or not at all?
5. Have you ever smoked tobacco in a pipe, even one or two puffs?
6. Do you now smoke a pipe everyday, some days, or not at all?
